

Age Calculator

Here's a great calculator that will surprise every adult around you!

Supplies

- A calculator

Directions

1. Ask an adult to punch her age in a calculator.
2. Ask her to multiply it by 2.
3. Then, ask her to add 1.
4. Multiply the total by 5.
5. Again, multiply the total by 10.
6. Request the adult to write down the answer.
7. Take the calculator from the adult and ignore the last two digits and the number that you're left with is the adult's age!
8. Interesting, isn't it!
